

Addendum
Philippine Emergency Notes:
Counterstamped, Signed & Initialed (CSI)
Cebu Province
by
Kenneth J. E. Berger, D. Env.

One of the problems with a work such as this is that there is no definite end. New CSIs will continuously be discovered. For example, within three days from when this book was sent to the printer, new CSIs were identified. One of them had a previously unknown date with a different font; while the other, although known, had never been seen on a Cebu note.

Therefore, this Addendum contains CSIs, along with additional information, which were discovered too late to be included in the main body of the book. As with the book and the CSI color scans, all notes have been normalized, as close as possible, to the sizes identified in the chapter entitled General Characteristics of the Cebu Notes. This was done so that the size differences among the various CSIs can be determined.

Likewise, the color, brightness and contrast have been adjusted for each individual note so as to maximize the clarity of the CSIs. Thus, there is no uniformity with respect to these three properties.

S.S. Corregidor (from the collection of Robert Zavitz, 2016)

Page 43

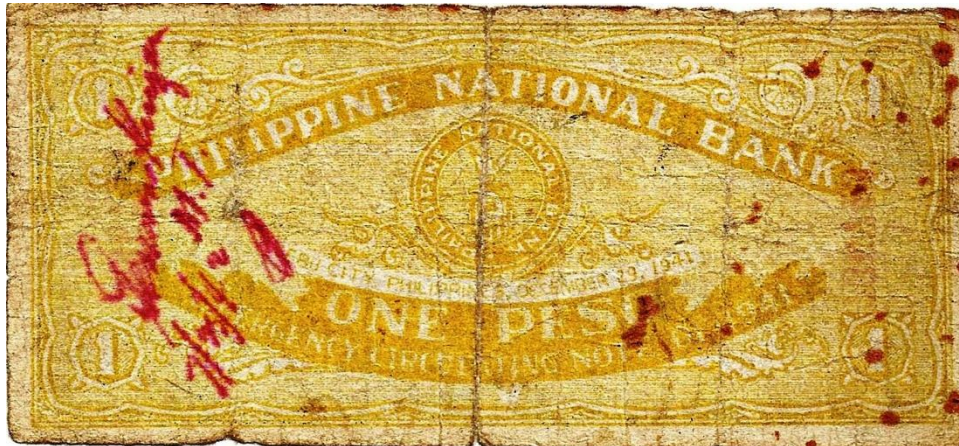

The signature has been identified as belonging to Lt. M. F. Rosales

Page 51

Bato

This is a Type C with Signature 3 but with an abbreviated handwritten title.

Notes: 1/CB-1

Page 62

Calubian

This CSI has a previously unknown date, the word RECEIVED is in a different font, and the word CALUBIAN is wider.

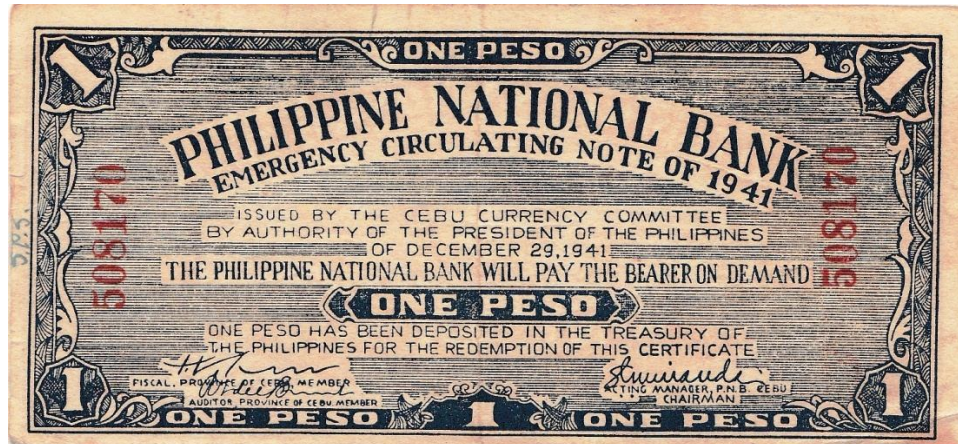

Notes: 1/CB-1

S.P.S.

Nothing is known about this CSI.

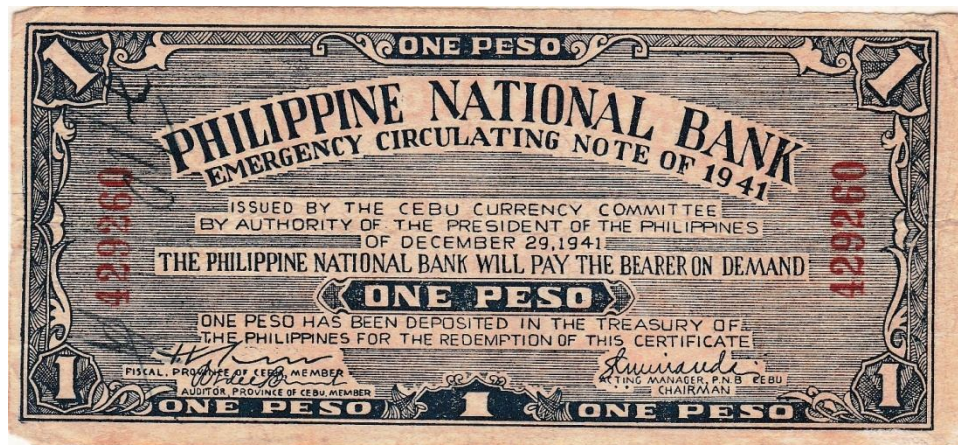

Notes: 1/CB-1

2/10 (and unreadable) initials

Nothing is known about this CSI.

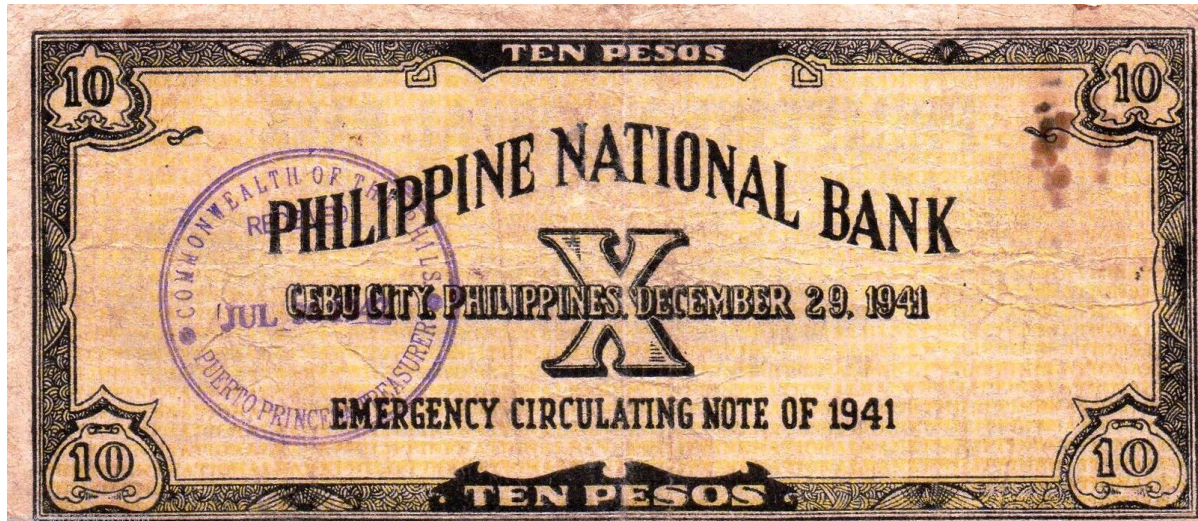

Notes: 1/CB-1

Puerto Princesa (9° 45' N, 118° 45' E; 567.0 km)

Dates: 7/30

Notes: 1/CB-10

Color Scans
for
Philippine Emergency Notes:
Counterstamped, Signed & Initialed (CSI)
Cebu Province
by
Kenneth J. E. Berger, D. Env.

The following are color scans of all the notes that appear in *Philippine Emergency Notes: Counterstamped, Signed & Initialed (CSI) – Cebu Province* by Kenneth J. E. Berger, D. Env. (2016). The color, brightness and contrast have been adjusted for each individual note so as to maximize the clarity of the CSIs. Thus, there is no uniformity with respect to these three properties.
